## Objective

Dedicated and self-taught full stack web and app developer with a strong foundation in the MERN stack and React Native. Passionate about problem-solving and driven by the goal of using programming to address real-world issues. Aiming to build a successful career in tech, with the ultimate goal of launching a startup focused on innovative solutions.

## Skills

- **Languages & Frameworks:** JavaScript, React, React Native, Next.js, Node.js, Express.js, MongoDB
- **Tools & Technologies:** Visual Studio Code, Git, GitHub, Firebase, Supabase, TMDB API
- **Development Focus:** Full Stack Web Development (MERN), Mobile App Development, Frontend Development
- **Soft Skills:** Problem-solving, adaptability, ability to stay current with industry trends, effective communication

## Education

### Bachelor of Science in Computer Science

University of Eldoret, Kenya (2024 - 2028)

### High School Diploma

Moi University High School, Kenya (2020 - 2023)

### Primary Education

Baraka Academy, Kenya (2008 - 2018)

## Professional Experience

### Collaborator, GDG Collabs Website

University of Eldoret, GDG Groups

- Developed the frontend of the GDG Collabs website, focusing on user-friendly design and responsive layouts.
- Collaborated with a team to create an engaging platform for GDG community events and resources.

## Projects

### Student Admin Dashboard

GitHub Repository: [Student Admin Dashboard](#)

- Developed a full-featured student administration dashboard using Next.js, Node.js, Express, and MongoDB.
- Implemented CRUD operations, user authentication, and data visualization for a streamlined user experience.

### **Cineverse Mobile App**

*GitHub Repository:* [Cineverse Mobile](#)

- Built a movies app using React Native, integrating the TMDB API for real-time movie data.
- Designed a visually appealing and intuitive user interface, enabling users to browse and search for movies.

### **Achievements & Interests**

- **Community Involvement:** Collaborated with GDG groups at the University of Eldoret.
- **Career Goals:** To excel in software development and eventually launch a startup focused on solving global challenges.
